

AGR 2000/M 226 US

1. A nucleic acid molecule with the function of a caryopsis-specific promoter, which nucleic acid molecule
  - a) comprises the nucleic acid sequence defined by Seq ID No. 1 or deposited by DSM 13398 (plasmid p 11/1);
  - b) comprises one or more sequence elements selected from the group consisting of
    - i) cagcgaagg cgctcgcc agccagac (Seq ID No. 2);
    - ii) agaaacaaac aaacaaacaaaagt (Seq ID No. 3);
    - iii) ccttcagga cgaatctcg gtgccttaag acacctacc ttgtgtcta tgacatgtga gccaacag atggct (Seq ID No. 4);
    - iv) ccgtctagg cgctcggtgt ccggcc (Seq ID No. 5);
    - v) caggagcct tcga (Seq ID No. 6);
    - vi) tcagccagtt ccacccgtg cagc (Seq ID No. 7) and
    - vii) tactctgttc atgttaa (Seq ID No. 8);
  - c) comprises a functional portion of the nucleic acid sequence stated under a);
  - d) comprises a sequence which hybridizes with at least one of the nucleotide sequences stated under a) and/or b); and/or
  - e) comprises a sequence which has approx. 60-99% identity, preferably approx. 75-99% identity, in particular approx. 90-99% identity and very especially preferably approx. 95-99% identity with one of the nucleic acid sequences stated under a).
2. A nucleic acid molecule as claimed in claim 1, which is a promoter active in plants.
3. An expression cassette comprising a nucleic acid molecule as claimed in claim 1.
4. A vector comprising a nucleic acid molecule as claimed in claim 1 or an expression cassette as claimed in claim 3.

5. A vector as claimed in claim 4 which is suitable for transforming plant cells.

6. A host cell which is genetically modified with a nucleic acid molecule as claimed in claim 1, with an expression cassette as claimed in claim 3 or with a vector as claimed in claim 4.

7. A host cell as claimed in claim 6, which is a pro- or eukaryotic cell.

8. A host cell as claimed in claim 6, which is a plant cell.

9. A plant comprising plant cells as claimed in claim 8.

10. Propagation material or harvested material from plants as claimed in claim 9, comprising plant cells as claimed in claim 8.

11. A method of generating transgenic plant cells as claimed in claim 8, wherein plant cells, plant tissue, plant parts or protoplasts are transformed with a nucleic acid molecule as claimed in claim 1, a vector as claimed in claim 4, with an expression cassette as claimed in claim 3 or with a host cell as claimed in claim 6, and the transformed plant cells, plant tissues, plant parts or protoplasts are grown in a growth medium.

12. A method of generating transgenic plants as claimed in claim 9, wherein plant cells, plant tissue, plant parts or protoplasts are transformed with a nucleic acid molecule as claimed in claim 1, a vector as claimed in claim 4, with an expression cassette as claimed in claim 3 or with a host cell as claimed in claim 6, the transformed plant cells, plant tissues, plant parts or protoplasts are grown in a growth medium, and intact plants are regenerated from these.

13. The use of a nucleic acid molecule as claimed in claim 1 for the caryopsis-specific expression of genes in genetically modified plants.

14. The use of a nucleic acid molecule as claimed in claim 1 for the caryopsis-specific suppression of genes in genetically modified plants.

15. A method for the caryopsis-specific gene expression in plants, wherein a nucleic acid molecule as claimed in claim 1 is stably integrated into the genome of a plant cell, and the plant is regenerated from said plant cell.

16. A method for the caryopsis-specific gene suppression in plants, wherein a nucleic acid molecule as claimed in claim 1 is stably integrated into the genome of a plant cell, and a plant is regenerated from said plant cell.
